TERMINAL DISCLAIMER

Hon. Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Celanese Emulsions GmbH, Assignee of the entire right, title, and interest in and to United States Patent No. 6,025,427 issued February 15, 2000, and the owner of the above-identified application and any Letters Patent issuing thereon, hereby disclaims the terminal part of any patent granted on the above-identified application which would extend beyond the expiration date of U.S. Patent No. 6,025,427 and hereby agrees that any patent so granted on the above-identified application shall be enforceable only for and during such period that the legal title to said patent shall be the same as the legal title to said Patent No. 6,025,427; this agreement to run with any patent granted on the above-identified application and to be binding upon the grantee, its successors or assigns.

Notwithstanding the instant Terminal Disclaimer and in the event the expiration date of the Letters Patent No. 6,025,427 is less than 17 years from the date of issue or 20 years from the date of filing thereof, whichever is longer, for failure to pay a maintenance fee

or any other reason, Assignee does not disclaim any terminal part of a patent granted on the above-identified application which extends from a date prior to the normal expiration date of said Letters Patent No. 6,025,427.

The Assignment from Clariant GmbH to Celanese Emulsions GmbH was submitted to the Patent Office on July 10, 2003 for recording but has not yet been returned.

The undersigned (whose title is supplied below) is empowered to sign this certificate on behalf of the assignee.

I hereby declare that all statements made herein of my own knowledge are true, and that all statements made on information and belief are believed to be true; and further, that these statements were made with the knowledge that willful false statements, and the like so made, are punishable by fine or imprisonment, or both under Section 1001, Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

Respectfully submitted,
Muserlian, Lucas and Mercanti
